(a) 15 interleaved repeats
median of the repeats
seam dearer on 9 repeats
seam cheaper on 6 repeats
One signalling operation (µs)
17
16
15
14
13
12
called natively
from Rust
called from C++
through the seam
(b) No cost detected, and the bound on it
upper bound 10.9% of the operation
p = 0.239
the empty crossing, 2.54 ns
95% CI: what the measurement could have missed
paired difference (seam − native)
−2000 −1500 −1000 −500 0 500 1000 1500 2000
Seam cost per operation (ns)
