Inside the guarantee
compile error in safe Rust
Lifetime and aliasing
ownership and borrowing
Use-after-free
Double-free
Iterator invalidation
Unsynchronised access
data races (Send/Sync)
Data race
Unguarded shared mutation
No test required
Outside the guarantee
compiles and misbehaves in both
Order of lock acquisition
neither compiler prevents this
Lock-order deadlock
Atomicity of a composed operation
race conditions
Lost update
Fails quietly
the boundary
